PROFESSIONAL SUMMARY

Automation QA Engineer with 4+ years of experience in designing and implementing scalable automation frameworks for web and API applications. Proficient in Selenium, Cucumber, TestNG, and Rest Assured with hands-on experience in CI/CD integration using Jenkins. Proven ability to reduce regression effort, improve test coverage, and ensure high-quality product delivery in Agile environments.

EDUCATION

Master Of Computer Application. Madhav Institute of technology & science (MITS), Gwalior.	Jul 2018 — Aug 2021 8.13 CGPA
Bachelor Of Computer Application. Jiwaji University, Gwalior.	Jul 2014 — June 2018 67%
HSC School of Excellence No.1, Gwalior.	Jul 2012 — May 2014 69%
SSC School of Excellence No.1, Gwalior.	Jun 2011 — May 2012 85%

WORK EXPERIENCE

Consultant – QA Automation Engineer Capgemini Technologies Services India Limited, Bengaluru.	Sept 2021 — Present
- Developed and maintained Selenium-based automation framework using TestNG and Cucumber, reducing manual regression effort by 40% - Designed and executed API test automation using Rest Assured and Postman, improving API reliability and coverage - Integrated automated test suites with Jenkins CI/CD pipelines for continuous testing and faster feedback cycles - Created reusable test scripts and utilities, improving execution efficiency and maintainability - Performed functional, regression, integration, and API testing across web. - Identified, tracked, and reported defects using JIRA, reducing production defects significantly - Collaborated with cross-functional teams in Agile environment for faster delivery and quality assurance	

CERTIFICATIONS

- ISTQB Certified Tester
- Appium Mobile Testing
- Tosca Automation Specialist Level 1
- Agile Software Development

TECHNICAL SKILLS

Automation Tools: Selenium, Cucumber, TestNG, Cypress, Playwright
API Testing: Rest Assured, Postman
CI/CD: Jenkins
Programming Languages: Java, SQL
Tools: JIRA, Maven, Git, Eclipse, SSMS, JMeter, TFS, Visual Studio
Methodologies: Agile (Scrum)

KEY PROJECT HIGHLIGHTS

- Built automation framework from scratch using Selenium + JAVA +TestNG
- Automated critical business workflows reducing manual effort
- Worked on API automation for backend validation
- Contributed to CI/CD pipeline implementation for automation suites

ADDITIONAL INFORMATION

- Strong analytical and problem-solving skills
- Good communication and team collaboration abilities
- Passionate about learning new automation tools and technologies
